Opening round of the UCI Mountain bike World Cup took place in Leogang. Almost 7 months after the last race, our riders were excited to jump on the bike again.

The first day was for the track walk, and the track didn't have many changes. Last year's woods section was a bit more ridden in and would be better to ride this year for sure!

After a few laps of training, the track was ever-changing, ruts and roots appeared and almost every run was different. For his third junior quali and after a prolific winter, Christopher took pole position for the first time!

Our Canadian, Finn confirmed his good results from last year and ended 6th. After a few hard months due to injuries, Loic ended in 19th place!

Sunday, finals

After few days of rain and unpredictability, the sun is finally returned for the main day of the week!

It was an early start for our junior, but unfortunately, too many mistakes for him caused him to enter the motorway without good speed. A further slip out of his line at the entrance to the woods and Christopher couldn't fight for a better place than 7th.

The goal for Bruni was top 10, and he did it! Not the place he's usually fighting for but this weekend Loic built the base for the rest of the season!

Our final rider on track, Finn! He had a good run with few mistakes and finished in the top 15 with 14th place!

Despite the difficult week, we continue to build for a solid season.
